Status & next steps

Strength: Broad verified learning (resources + Academy) and a full assignment surface (35 cards). Public ML paper, agent, and portfolio are live for review.

Gap: Capstone shows **0/1 accepted**. Until acceptance, capstone estimated hours remain 0 in the portal total. Recommended next step: confirm ML-11 paper URL in submission/paper_url.txt, ensure the live paper passes public-safety and section checklist, then request or await formal capstone acceptance.

Fluency close-out: Complete portal hours confirmation if required, publish the build-in-public post, and attend final review / sign-off when scheduled.
